Labor Category Descriptions

SIN 54151S

Senior Project Manager	
Minimum Experience:	6 years
Minimum Education:	Bachelor's
Functional Responsibilities:	• Lead assigned projects to completion • Provide project managers with feedback, encouragement and advice • Troubleshoot problems that come up during projects • Develop individual project plans complete with budgetary information and resource needs • Communicate with our IT department about resource allocation • Host a project meeting at least once per week for each project under your direction • Refine project budget as needed to ensure timeliness and fiscal responsibility • Coordinate with vendors and suppliers as needed • Communicate project objectives to all team members involved.

Software Developer	
Minimum Experience:	3 years
Minimum Education:	Bachelor's
Functional Responsibilities:	• Work with developers to design algorithms and flowcharts • Produce clean, efficient code based on specifications • Integrate software components and third-party programs • Verify and deploy programs and systems • Troubleshoot, debug and upgrade existing software • Gather and evaluate user feedback • Recommend and execute improvements • Create technical documentation for reference and reporting

Senior QA Testing Engineer	
Minimum Experience:	5 years
Minimum Education:	Bachelor's
Functional Responsibilities:	• Meeting with the software/product designers to determine quality assurance parameters. • Leading the QA team in designing QA test procedures. • Overseeing the drafting of testing documents. • Implementing testing procedures and overseeing the QA process. • Troubleshooting quality issues and modifying test procedures. • Conducting analysis checks on product specifications. • Reviewing Quality Assurance reports. • Ensuring the successful deployment of products into the market. • Responding to requests from the design team and management.

Cloud Ops Engineer	
Minimum Experience:	5 years
Minimum Education:	Bachelor's

Functional Responsibilities:	• Configuration and infrastructure management with tools like Terraform • Executing and troubleshooting SaaS application deployment procedures • Development of and continual improvement of automation and procedures • Analyzing and supporting infrastructure in AWS • Monitoring system performance and recommend corrective action. • Documenting current environment and ongoing maintenance of documentation • Collaborate with product owners, developers, and support staff to ensure continuous and reliable delivery of service.

Architect	
Minimum Experience:	5 years
Minimum Education:	Bachelor's

Functional Responsibilities:	• Devising and reporting on integration development plans and strategies. • Developing asynchronous messaging architectures, rule-based systems, and network architectures. • Coordinating activities with other developers to ensure that integration projects are completed on time. • Formulating strategies and designing architectures for systems integrations. • Ensuring that best practices in integration processes are followed by the organization. • Checking and correcting conflicts in data configurations and overlaps. • Maintaining the integrity and smooth functioning of the company's integration architecture. • Analyzing and improving current system integrations and migration strategies.

Data Architect	
Minimum Experience:	5 years
Minimum Education:	Bachelor's
Functional Responsibilities:	• Developing and implementing an overall organizational data strategy that is in line with business processes. The strategy includes data model designs, database development standards, implementation and management of data warehouses and data analytics systems. • Identifying data sources, both internal and external, and working out a plan for data management that is aligned with organizational data strategy. • Coordinating and collaborating with cross-functional teams, stakeholders, and vendors for the smooth functioning of the enterprise data system. • Managing end-to-end data architecture, from selecting the platform, designing the technical architecture, and developing the application to finally testing and implementing the proposed solution. • Planning and execution of big data solutions using technologies such as Hadoop. In fact, the big data architect roles and responsibilities entail the complete life-cycle management of a Hadoop Solution.

	• Defining and managing the flow of data and dissemination of information within the organization. • Integrating technical functionality, ensuring data accessibility, accuracy, and security. • Conducting a continuous audit of data management system performance, refine whenever required, and report immediately any breach or loopholes to the stakeholders.

Middleware Support Engineer	
Minimum Experience:	3 years
Minimum Education:	Bachelor's
Functional Responsibilities:	• Coordinate with vendors and support team on problem resolution, design issues and upgrades. • Perform troubleshooting, incident response, and patching in a timely manner. • Troubleshoot and resolve technical problems in timely and accurate manner to improve application performance and functionality. • Develop and implement strategies for migration, consolidation and upgrade of middleware components. • Evaluate system architecture and make recommendations as required. • Analyze and develop technology solutions based on customer requirements. • Build and implement middleware products to meet business demands. • Work with Developers and Architects in developing middleware configurations based on requirements.

Lead Middleware Engineer	
Minimum Experience:	8 year
Minimum Education:	Bachelor's
Functional Responsibilities:	• Analyze and develop technology solutions based on customer requirements. • Build and implement middleware products to meet business demands. • Work with Developers and Architects in developing middleware configurations based on requirements.
